I am a passionate Computer Science and Engineering undergraduate with a strong interest in software engineering. I am a team player, willing to commit and take responsibility for the task at hand.

EDUCATION

University of Moratuwa BSc Eng Hons, Computer Science and Engineering	2022 – Present
Lyceum International School – Panadura AL 2020 3A IR – 731 OL 2017 9A	2008 – 2019

WORK EXPERIENCE

WSO2 Pvt Ltd – Software Engineer Intern <i>React Redux MUI Ballerina MySQL Asgardeo Choreo</i>	2025 Jan – 2025 Jun
- Developed the WSO2 Visitor application end-to-end, covering both frontend and backend implementations for tracking on-premise visitors. - Developed a mobile microapp for the Visitor Application to include in the WSO2 Super App. - Participated in code reviews and security reviews. - Conducted comprehensive threat modeling and security reviews to identify and mitigate high-risk vulnerabilities prior to production deployment.	

TECHNOLOGIES

Web Development:	HTML, CSS, Tailwind CSS, React, Flask, .NET, ViteJS, NextJS, Spring Boot
Database Management:	MySQL, MSSQL, MongoDB, Supabase
Version Control:	GitHub, Git
Programming Languages:	Python, Java, C++, JavaScript, Ballerina
Cloud Services:	Azure, Choreo, Vercel
Machine Learning:	PyTorch, Scikit-learn, Pandas, Hugging Face
Software Testing:	Jest, Cypress, Google Lighthouse
Other Tools:	Asgardeo, Xilinx Vivado, Android Studio, Material UI

PROJECTS

1. Generating Distributed Code From Single Node Code (FYP) – Ongoing <i>Research Java Microservices Software Architecture</i>	2025 Jul – Present
- Developed an automated framework for transforming monolithic Java applications into microservices using heterogeneous graph learning and weak triplet-guided semantic supervision. - Designed and implemented an end-to-end graph learning pipeline integrating code analysis, heterogeneous graph construction, model training, and service clustering for automated software decomposition. Publication: <i>From Monolith to Microservices: A Comparative Evaluation of Decomposition Frameworks</i>, accepted and presented at WorldCist'26.	
2. Subscription Tracker  <i>Spring Boot React MySQL</i>	2026 Apr – Present
- Developed a full-stack subscription management platform using Spring Boot, React, TypeScript, Redux Toolkit, and MySQL. - Implemented secure JWT authentication with Google Sign-In, role-based API protection, and RESTful CRUD services. - Built scheduled background services to detect upcoming renewals and send automated email notifications using SendGrid. - Designed analytics features to track recurring expenses, categorize subscriptions, and estimate future subscription costs.	

3. Worker Trust System  <i>Supabase React Native NodeJS</i>	2025 Nov – 2025 Dec
- Developed a mobile application to help users find reliable service workers such as plumbers and electricians through location-based search and trust scores. - Implemented worker profiles with ratings, reviews, and service request functionality.	
4. GitFraud Analyser  <i>Python Hugging Face</i>	2025 Nov – 2025 Dec
- Developed a tool to detect fake commits used to artificially populate Git contribution graphs. - Analyzed commit history and returned a percentage similarity score using heuristic and LLM-based methods.	
5. Anonymous Thoughts  <i>NextJS NodeJS MongoDB Vercel MUI</i>	2025 Aug – 2025 Dec
- Built an anonymous content-sharing platform for posting thoughts and reflections securely. - Used a Hugging Face NLP model to flag and prevent personal attacks. - Used Jest for unit testing and Cypress for component testing.	
6. Neurohire  <i>React MySQL Gemini API Python MUI</i>	2025 Mar – 2025 Jun
- Built an AI-powered resume screening system to help companies manage job postings and applications. - Integrated Google Drive for storing resumes and used a RAG pipeline to filter appropriate CVs.	
7. Inventory Management System  <i>MySQL React .NET Jest Azure Tailwind CSS</i>	2024 Jul – 2024 Nov
- Developed a system for universities and institutions to track computer laboratory equipment. - Built complete mobile and web applications with testing using Jest and Cypress.	

CERTIFICATIONS

- Spring Boot 4, Spring 7 & Hibernate for Beginners 
- Supervised Machine Learning: Regression and Classification 
- Advanced Learning Algorithms 
- Unsupervised Learning, Recommenders, Reinforcement Learning 

VOLUNTEERING & LEADERSHIP

Sasnaka Sansada Foundation Ganitha Sawiya Coordinator – Kalutara District District Coordinator – Kalutara District	2021 – Present 2022 Jun – 2022 Dec 2023 Jan – 2024 Dec
- Participated in and organized more than 35 mathematics seminars throughout the country. - Served as part of the organizing committee and provided guidance for projects in Kalutara District from 2022 to 2025.	
Gavel Club – University of Moratuwa Pillar Head – Personal Relations, Gavel Orientation 2023 Speech Olympiad XVI 2024 Participant – Speech Olympiad XV, Speech Olympiad XVI	2022 – 2024
Badminton – University of Moratuwa University Colors 2023, 2024, 2025 – Badminton Member of Inter-University Badminton Team 2024 Team Manager for 2025	2023 Jan – Present
